## **MO River Watershed Festival Information**

The Missouri River Watershed Festival is a 2 state, 7 county Metro KC regional event, sponsored by the MO River Watershed Festival Committee. The festival fosters awareness and elicits behavioral changes in youth regarding non-point source pollution (NPS) throughout the Metropolitan Kansas City region.

The Missouri River Watershed Festival goals are to:

- educate participants about NPS pollution
- emphasize behavior changes by demonstrating how an action in one part of the watershed can affect the entire region
- demonstrate how critical thinking in system analysis can lead to effective problem solving and decision making
- teach about widespread repercussions of individual actions and allow the participants to apply these concepts to many aspects of their daily lives
- improve participants potential to become effective, critical thinking members of society who will pass these values on to peers and offspring; thereby, establishing a sustainable environmental ethic

---

## **Activity/Exhibit Guidelines**

Displays should be interactive, fun, educational and related to water quality, water recreation, rivers, local watersheds, urban stormwater, aquatic education, solid waste management, or community opportunities/development. Please focus organizational displays on your organization's connections to these topics.

In an effort to reduce waste, we ask that materials such as handouts, brochures, and posters not be given to students but reserved for teachers and group leaders. If you would like more information on handouts, please contact Cheri Miller (address below) or check out the MO River Watershed Festival website page at [www.littleblueriverwc.org](http://www.littleblueriverwc.org)!
